Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: 1) An apparatus, method and storage medium comprising a processing unit wherein an offer information registering unit registering the offer conditions when the search result indicates that either the sales conditions match with the offer conditions and a notice from the purchaser indicates non-agreement to the search result, or the sales conditions do not match with the offer conditions; 2) An apparatus, method and storage medium comprising a processing unit wherein an offer information registering unit registering the offer conditions when the search result indicates that either the sales conditions match with the offer conditions and a notice from the purchaser indicates non-agreement to the search result, or the sales conditions do not match with the offer conditions, and registering the offer conditions as a purchase when the search result indicates that the sales conditions match with the offer conditions and a notice from the purchaser indicates agreement to the search result ; 3) An apparatus , method and storage medium comprising a processing unit wherein an offer information search unit receiving the sales conditions, searching in the offer information registration unit the offer conditions matching the sales conditions, collecting the offer conditions matching the sales conditions, and transmitting a sales result to the seller terminal comprising the offer conditions matching the sales conditions and allowing the seller to accept or decline the sales result; 4) An apparatus, method and storage medium comprising a

processing unit as described in claim 10; 5) An apparatus, method and storage medium comprising a processing unit as described in claim 12; 6) An apparatus, method and storage medium comprising a processing unit as described in claim 13.

2. The species are distinct because based on their separate effects.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

3. A telephone call was made on 3-20-2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard C Weisberger whose telephone number is 571 272 6753. The examiner can normally be reached on Maxiflex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vince Millin can be reached on 571 272 6747. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
